forma&cemento

IDEATED • MADE  
IN ITALY

La linea TADAO, in omaggio  
al noto architetto con cui  
si condivide l'approccio minimilista  
e l'uso del materiale, è la sintesi  
perfetta della nostra filosofia:  
lo studio della struttura trasforma  
il materiale in un segno stilistico  
libero dal suo peso fisico e percepito.

The TADAO line, created in  
homage to the famous architect  
with whom we share  
a minimalist approach and  
a creative use of the material,  
is the perfect synthesis of our  
philosophy: our study of the  
material transforms the material  
into a stylistic symbol unaffected by  
the structure transforms

symbol free from its physical  
weight and perceptions.

Harmony between the form and versatility of cement gives life to the concept of lightness and design. Our study of the material, aimed at the enhancement of the properties thereof, constitutes an essential element of the process: the very nature of the material inspires the creation of a symbol unaffected by the passage of time. Cement will become synonymous with continuous research and constant evolution, altering the perceptions of innovation and imagination. Craftsmanship and design Made in Italy.

*Consolle  
in malta cementizia  
ultraperformante  
fibrorinforzata  
di Sp.15 mm.*

La forma, sintesi di un confronto tra designer ed ingegneri, contribuisce alla riduzione degli spessori generando una leggerezza formale e fisica agli oggetti.

La materia dalle origini antiche, figlia delle malte pozzolaniche romane, si avvale di tutte le più avanzate scoperte per raggiungere le massime prestazioni.

*15mm thick  
console table  
in high performance  
cement with  
a fibre-reinforced  
structure.*

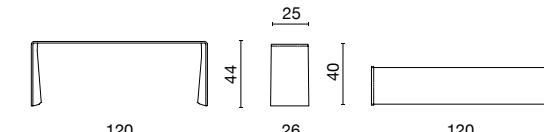

The dialogue between engineering and design creates physical and formal lightness, through the reduction of thickness and weights.

This matter with ancient origins, descendant from the Roman pozzolanic mortar, now incorporates the most advanced technologies to achieve the highest performances.
